	<p>and</p> <p>c) if there is a discrepancy between words and figures, the amount in words shall prevail, unless the amount expressed in words is related to an arithmetic error, in which case the amount in figures shall prevail.</p> <p>1.88 If the Bidder does not accept the correction of errors made by UNDP, its Proposal shall be rejected.</p>

Section 5. Terms of Reference

Business Call to Action's Capacity Building for the Replication and Adaptation of Inclusive Business Models in Technology-Enabled Healthcare

A. Background Information and Rationale

BCtA is a unique multilateral alliance among donor governments and agencies, including the Arab Gulf Fund (AGFund), the Dutch Ministry of Foreign Affairs (Minbuza), the Swedish International Development Cooperation Agency (Sida) and the Swiss Agency for Development and Cooperation (SDC), with the United Nations Development Programme hosting the secretariat. BCtA aims to accelerate progress towards the Sustainable Development Goals (SDGs) by challenging and supporting companies to develop inclusive business (IB) models that offer the potential for both commercial success and development impact. BCtA aims to enhance the visibility, credibility, scale and effectiveness of IBs as market-based solutions to contribute to the achievement of the SDGs and benefit those at the base of the economic pyramid (BoP).

BCtA's value proposition is to drive the IB agenda globally by engaging the private sector, governments and the development community in joint efforts towards inclusive economic growth and social impact. BCtA members are market leaders and innovators, committed to developing commercially viable business ventures that engage people living at the BoP as consumers, producers, suppliers, and distributors of goods and services. Worldwide, 280 companies have responded to our call to action by making commitments to improve the lives and livelihoods of millions through commercially viable business ventures.

A number of these businesses operate specifically in sectors related to the delivery of essential "COVID-19-relevant" services using digitally enabled resilient models. These businesses apply proven models designed to serve the income-poor across multiple geographies, and include platforms that deliver technology-enabled cost-effective healthcare, ensure farm productivity and farmer income, or provide livelihood skills development through e-learning, as well as low-cost infrastructure that provides access to affordable internet services.

As part of its Phase III operations, BCtA seeks to transition its service offerings starting from 2021. This phase will focus on delivering an inclusive innovation-through-replication methodology by adapting existing and proven inclusive business models to suit the needs of new geographies and contexts and supporting the establishment of businesses in these areas. The proven viability of these models to serve the income-poor will limit the necessary implementation time and risk associated with their application, whilst ensuring that innovative approaches reach a scale that reflects their ability to sustainably solve development challenges. By adopting inclusive innovation-through-replication journeys, BCtA aims to support governments to deploy proven solutions through inclusive innovation processes, thereby serving increasingly poor populations in shrinking fiscal space while mitigating the risk that is inherent within innovation.

This service will first be established in partnership with UNDP Country Offices and Regional Bureaux to advance private sector- and government-led replication and adaptation of inclusive business models in **technology-enabled healthcare**. It will combine a micro-level bilateral approach, working directly with inclusive businesses to replicate and scale existing successful models, with a macro-level network approach based on high-level advocacy. This latter activity consists of working with governments and in-country institutions to improve the environment in which IBs operate and assist governments to promote the

development of IB ecosystems and choose the elements of private sector-led progress towards the SDGs that they wish to prioritize given their particular developmental challenges.

BCtA's primary goal in adopting this operational mechanism is to build a more resilient and inclusive future in the healthcare sector, promoting the achievement of all the 17 SDGs through the lens of SDG 1. Specifically, the programme aims to achieve the following:

- Support the resilience, continuity and scale-up of pro-poor technology-enabled healthcare businesses to enable them to fill development gaps;
- Propagate government-led inclusive innovation processes in the technology-enabled healthcare sector where risks are mitigated by using the successes of BCtA member companies' models as a starting point;
- Promote COVID-19 relevance and COVID-19 resilience by replicating and adapting proven models of the digitally enabled delivery of essential services;
- Support the adaptation of inclusive innovations across areas of operation and countries
- Ensure that technological progress and digital transformation in the healthcare sector include low-income groups not only as consumers, but also reduce the inequalities in accessing, developing and implementing innovative ideas.

B. Project Description

The project outlined in this document forms a major part of BCtA's operations, which will focus on employing proven, innovative and market-based inclusive business models to advance progress towards the 17 SDGs. As part of this approach, BCtA intends to engage inclusive businesses currently implementing proven models that are self-sustainable, effective in improving the living standards and opportunities provided to low-income populations, and possess the potential to be replicated and adapted in new locations or markets to reach scale. These companies will be contracted by BCtA to provide technical assistance services to newly established businesses that implement solutions in the same sectors, but in different markets or geographies, supporting their journeys in establishing and growing new inclusive business models. This replication and adaptation process will be facilitated and coordinated by BCtA and its partners, together with the contracted company, in order to raise the impact of inclusive business and place the private sector at the center of the effort to achieve the 2030 Agenda.

Contracted companies will become mentors and advisors to replicated and adapted business models, employing their unique position of having developed similar solutions and their wealth of experience in overcoming the specific challenges of implementing business model across geographies in middle- and low-income, conflict-ridden and fragile countries. They will share their experience and mentor other companies in sector-specific aspects of their business model, supporting them to replicate and adapt solutions to the local context. They will offer hands-on support throughout the planning and set-up phases, providing the framework to reach scale.

The project will adopt the following framework for the replication and adaptation of business models, working with a number of stakeholders (including contracted companies, BCtA member companies, potential replicator companies, governments, in-country institutions, UNDP Country Offices and Regional Bureaux, Development Finance Institutions, impact investors and business accelerators):

- (1) **Mapping** (producing intelligence of development gaps and challenges, defining developmental barriers through data collection and analysis, and assessing current policies and regulatory environments in the location of interest)
- (2) **Problem-solving** (sourcing and identifying potential market-based solutions and determining replicability)
- (3) **Piloting** (connecting partners, and replicating and adapting models)
- (4) **Scaling** (standard-setting for expansion and supporting businesses to achieve this goal)
- (5) **Learning** (identifying lessons learned and delivering these to IB-affiliated stakeholders through the development of guidelines and tools)

Mapping and problem-solving tasks will be performed by individual consultants and piloting, scaling and learning tasks will be performed by Bidders selected both under this RfP and under the *secondary bidding process* (amongst other partner organizations).

C. Long-Term Agreement Objective and Set-Up

The overall objective of setting up this Long-Term Agreement (LTA) (On-Call) is to provide technical assistance to UNDP Country Offices and Regional Bureaux in the replication and adaptation of inclusive business models over an initial period of 3 years with a possible extension to 5 years (2021-2026).

“LTA” refers to a mutual arrangement whereby consultants provide services as required over a specific period of time. An LTA specifies the unit price(s) of services, allowing for a framework agreement to be used when the firm’s services are needed.

LTAs do not require a financial commitment from UNDP at the time the LTA is signed. Financial commitments will be established on an ad-hoc basis every time services are requested within the scope of the LTA and a contract will be issued.

The selection process for the establishment of LTAs will be managed under an open competition under this Primary RfP (represented by this document), which will be then followed by *secondary bidding processes* relating to specific projects to be undertaken according to demands received from BCtA partners. Under this structure, BCtA will conduct *secondary bidding processes* wherein LTA-holders selected as part of the Primary RfP will be invited to submit proposals for specific projects as and when demands arise from BCtA in-country partner organizations. Only following a Bidder’s selection under a *secondary bidding process* will services be provided. Information about these processes is provided below.

	Primary RfP (represented by this document)	Secondary Bidding Process(es) (to follow for companies selected as part of the Primary RfP process)
Purpose	Undertaken to select LTA-holders that will be eligible to submit proposals to provide consultancy services for specific replication projects in known sectors and areas of implementation (as and when demands arise from BCtA partner organizations)	Undertaken to select the appropriate LTA-holders for providing consultancy services to a specific project to be implemented in a known location and sector according to services requested by UNDP Country Offices and Regional Bureaux in the context of a specific replication project

Competition Structure	Open competition undertaken according to provisions outlined under this document	Closed competition undertaken according to a detailed ToR document that reflects the specific scope and type of work to be undertaken in supporting the replication of a business model in a specified market and location
Eligibility	Open to all businesses according to provisions specified under Section 2 of this document and the ' <i>Minimum Eligibility and Qualification Criteria</i> ' provided in Section 4 of this document	Open only to LTA-holders selected in the primary RfP process
Required Documentation	Forms and documents specified in Section 6 of this document	Forms and documents provided in Section 6 of this document (with the exception that Section 2 of Form E shall be revised to provide a methodology for the specific location and sector for replication identified by the <i>secondary bidding process</i> documentation)

D. Scope of Work

As part of BCtA's operations, companies with proven experience in the replication of their business models (originators) will be selected to provide technical assistance and mentorship to companies (in either or both the early-development or growth stages) that intend to adopt similar inclusive business models (replicators) and to support local governments in the provision of innovative and quality public services. The replicators will employ a similar model to the originator with scope for the adjustment and adaptation of the model to meet the needs of a particular country context, market or population.

The role of the contracted originator may include any of the following tasks (which will, in general, be undertaken largely in the order as written).² The exact tasks to be undertaken will be left to the discretion of the party (UNDP Country Office or Regional Bureau) inviting LTA-holders to submit proposals for specific projects with clear and identifiable activities in defined markets and territories according to need, as part of the *secondary bidding process*:

(1) Piloting:

- (i) Implementing the solution identified to address sectoral challenges, including:
 - a. Initiating the roll-out of the solution;
 - b. Enabling the implementation of the solution through digitalization (including in the use of digital platforms);
- (ii) Guiding the replicator through the implementation of planned business models and offering hands-on support when necessary to ensure effective implementation, including:
 - a. Providing technical assistance on the tools necessary to implement the model;
 - b. Validating the models, technologies and services with replicators and end-users to determine the most appropriate adjustments and innovations;

² It should be noted that, given the limits placed on individual working days under the LTA, the originator will only be responsible for the delivery of a relatively small proportion of the tasks and sub-tasks outlined.

- c. Ensuring risk mitigation and optimized decision-making through technical facilitation.

(2) Scaling:

- (i) Adapting the solution to be integrated into the ecosystem;
- (ii) Developing and integrating a framework for scaling the solution in partnership with the replicator and BCtA's partners;
- (iii) Defining the solution's key performance indicators (KPIs) and SDG-aligned indicators for future monitoring.

(3) Learning:

- (i) Training of entrepreneurs: sales, technical, business and sector-specific demands;
- (ii) Sharing systemic challenges, opportunities and context-specific insights into effective approaches, results and lessons learned from both the piloting and the full-scale replication process through the delivery of a report;
- (i) Developing guidelines to assist companies engaging in a replication and adaptation process;
- (ii) Delivering workshops on how prominent issues in replicating innovative business models can be overcome based on the context of implementation and learnings acquired through the contracted business' experience;
- (iii) Producing a report on how business-to-government models can be effectively implemented, systematizing lessons learned in terms of government engagement and the role of government institutions in the context of this replication experience;
- (iv) Developing and sharing guidelines on inclusive procurement, development partnerships and grant financing with BCtA.

These tasks will seek to implement the outcomes established by two prior stages of BCtA's innovation journey that will be undertaken by external individual consultants focusing on specific sectors and markets:

(1) Mapping, which will focus on identifying local population needs and areas of opportunity for intervention, proposing demographic groups and geographies that are best suited to the replication of the business model as based on market intelligence about opportunities, gaps and sector-specific challenges present; and

(2) Problem-solving, by identifying actionable problem-based solutions that respond to the challenges faced by project partners and end-users, and can be addressed by the originator's services, defining specific interventions and potential technologies to be employed, building a community of key stakeholders which foster collaboration and innovation to address sectoral challenges, and defining replicability levers based on the model's challenges, viability, adaptation potential and prospective performance gaps.

E. LTA Approach and Structure

Bidders submitting proposals under this RfP are expected to provide a theoretical methodology and planned approach that could be followed when replicating an appropriate business model in a new market or geography to be chosen by the Bidder. The example methodology will outline how a bidder would approach the implementation of a market-based solution to a contemporary development problem that should be expected to be more effective than other available solutions according to defined terms to be chosen by the

Bidder. It should focus on the piloting and scaling workframes, and how the individual aspects of work listed under the descriptions of piloting and scaling activities within Part D: '*Scope of Work*' of this ToR would be implementable under this theoretical methodology.

The submitted methodology and planned approach will be used as part of the evaluation process to determine the extent to which Bidders understand the potential for replication in their business model and the strengths, weaknesses, opportunities and threats of their business model in the context of replicating in a given market and location. The three restrictions Bidders must adhere to when selecting an example market and location for replication upon which to base their example methodology and planned approach are as follows:

- a. The sample market and location chosen by the Bidder should be within a developing country;
- b. Bidders should not provide a methodology and planned approach for implementing their model in a market or geography in which they currently operate;
- c. Bidders may only provide one example methodology and planned approach in their application.

Bidders should choose an example market and location that most aligns with their business model and best demonstrates their potential impact. The strengths, weaknesses, opportunities and threats related to replicating the Bidder's business model in this environment should be identified, with consideration of how strengths and opportunities can be leveraged, and weaknesses and threats managed included. How the Bidder's proposed example solution would differ from existing conventional solutions and how the implementation of the project would be monitored according to internal technical and quality assurance review and reporting mechanisms.

For each specific assignment, the hiring unit (BCtA Team) in UNDP Istanbul International Center for Private Sector in Development (IICPSD) will develop a specific ToR with a detailed scope of work, expected deliverables and project timeline for each project to be made available for the submission of proposals under a *secondary bidding process*. LTA-holders submitting proposals under *secondary bidding processes* will be expected to provide a detailed methodology and planned approach to address the requirements of the ToR defined for each specific project and the selected LTA-holder is expected to apply these methodologies and approaches as described in their technical proposal to accomplish the objectives of each assignment. The scope, direction, and progress of each assignment should be indicated in close consultation with the hiring UNDP unit, who in turn can also gather and provide feedback from the relevant UNDP colleagues.

F. Configuration of the LTA

UNDP will issue a call-off contract against the LTA only upon a specific requirement with clear and measurable deliverables. The price and schedule of payments will be determined at the time of the call-off contract through a *secondary bidding process*. Standards of Operation (SoP) for the *secondary bidding processes* will be developed and shared with the LTA-holders once the solicitation process is completed. These *secondary bidding processes* will contain more detailed ToRs that reflect the scope and type of work to be undertaken in supporting the replication of a business model in a specified market and region of operation. When required, UNDP will contact LTA-holders to provide a technical and price proposal. The quotes provided must be equal to or lower than the unit rates agreed in the LTAs. Call-off contracts are Institutional Contracts that fall under the framework agreement of the LTA.

The LTA will be signed with **a fixed daily fee for a 3-year period** (with an extendable period of 2 extra years); however, UNDP does not warrant that any quantity of services will be purchased during the term of the LTA as this will depend on forthcoming needs;

Once the LTA is signed, if there is a specific requirement/event to be documented, the focal person in the BCtA team shall contact LTA-holders under the specific workstream of *Capacity Building for the Replication and Adaptation of Inclusive Business Models in Technology-Enabled Healthcare* and invite LTA-holders to engage in the *secondary bidding process(es)*;

Upon receipt of the request from the BCtA Team, LTA-holders under *Capacity Building for the Replication and Adaptation of Inclusive Business Models in Technology-Enabled Healthcare* must submit a methodology, project implementation plan and financial proposal, covering professional fees, travel costs and other relevant costing items as specifically requested by the assignment/ToR **within 4 working weeks**. Upon review, if positive, UNDP will send the LTA-holder written communication confirming the requirement in the form of a work order or purchase order by email. The order will include details on the scope of the assignment, location of the assignment, number of hours/days to be worked, and other practical details. The price will be based on a daily fee specified by the LTA contract and upon agreed travel costs. After the work order has been sent, no further costs shall be reimbursed by UNDP (increased number of workdays/hours, or increased travel costs) unless there is prior written authorization by UNDP.

The following procedure will be followed in the selection of proposals in the *secondary bidding processes*:

1. BCtA will send project-specific ToRs to LTA-holders and provide a fixed period (four working weeks) to return a proposal;
2. BCtA will perform a comparative analysis to evaluate the proposals;
3. Selections under *secondary bidding processes* will be made according to the technical evaluation score received based on the allocation of points as outlined in Section 4: *Evaluation Criteria*;
4. The services will be delivered according to the provisions described under the specific *secondary bidding process*. Once the services are completed and have been approved by the BCtA team, the LTA-holder will send the following documentation for payment purposes:
 - a. A complete invoice indicating number of days worked and travel costs (if any);
 - b. Supporting documentation (bills/vouchers) for reimbursements of travel costs if applicable;
 - c. Copy of the UNDP order for the assignment.

G. Deliverables and Schedules/Expected Outputs

Expected outputs and delivery schedules shall differ in each assignment and will be detailed in each ToR, specified for each assignment. Upon receipt of the ToR, the Contractor(s) will be requested to propose a methodology and project implementation plan for the assignment and submit a financial proposal based on the work requirements and timeline specified in the ToR.

H. Key Performance Indicators and Service Level

- a. The performance of service will be evaluated based on the actual quality deliverables prescribed in the ToR for each assignment, the applicability of insights and knowledge obtained to inform the strategy and development of UNDP and other relevant development stakeholders, and timely completion of each deliverable;
- b. Contractor(s) should ensure timely identification of potential risks and signal any delays in deliverables to the hiring unit at UNDP. Adjustments to the project timeline and/or extension of the contract shall be discussed and documented in a form of contract amendment.

The LTA-holders for the *Capacity Building for the Replication and Adaptation of Inclusive Business Models* workstreams will work under the supervision of the BCtA Programme Manager based at the UNDP Istanbul International Center for Private Sector in Development.

Contract Management:

UNDP BCtA team will regularly monitor the performance of these LTA-holders, based on the following Key Performance Indicators (KPIs):

- **KPI 1: Responsiveness:** Institutions should respond and confirm their availability for an assignment by submitting the required documents within 4 weeks of UNDP's notification by email
- **KPI 2: Quality:** The quality of the deliverables is in line with the agreed ToR
- **KPI 3: Accuracy of Payment Documentation:** Contractors shall provide complete payment documentation including accurate invoices with correct quantities, unit price, complete travel bills/vouchers for reimbursement, etc.
- **KPI 4: Communication and Reporting:** The Organization/Institution/JV/Consortium/Association shall communicate and provide reports in a timely and professional manner. UNDP shall conduct annual performance reviews of these LTAs, which might include meeting with LTA-holders and receiving feedback from other stakeholders.

If the Organizations/Institutions/JV/Consortium/Association fails to meet UNDP's performance requirements detailed above, they will receive in the first instance a warning to improve their performance. Continued failure to meet performance requirements may result in the termination of the LTA.

I. Governance and Accountability

The supervision relationship for each assignment will be specified by the specific ToR issued as part of the *secondary bidding process(es)*. In general, the hiring unit will review the deliverables and evaluate the Contractor's performance.

The hiring unit, including other UNDP colleagues, will assist the Contractor(s) on assignment during the course of work, providing necessary information/documents, and connecting the Contractor(s) with resources and networks to accomplish the assignment.

J. Facilities to be Provided by UNDP

- a. UNDP will assist the Contractor(s) in gaining access to relevant information, if needed;
- b. The Contractor(s) will ensure that they have regional- and district-level access (where needed). The Contractor(s) will identify the need for meetings and will host the meetings. UNDP can facilitate some meetings upon request;
- c. The Contractor(s) will have sole responsibility for all logistical, administrative and maintenance support necessary to its personnel for the duration of the contract with no responsibility on the part of UNDP. This shall include the following:
 - The welfare of its staff, including payment of salaries, medical insurance, medical and casualty evacuation in the event of a security breakdown;
 - Arrangements for logistics across all aspects of the assignment, including transportation for its operations, accommodation and any visa requirements if travel is foreseen in the ToR;
 - Security for all its personnel and assets. Neither UNDP nor its partners shall provide security facilities or be liable for any individual and material damage.

K. Expected Duration of the Contract

This LTA (On-Call), is expected to have a duration of 3 years with a possibility for an extension to 5 years, depending on performance and the Organization's needs. The maximum working days under this contract will be 150 person-days of work per year per workstream.³

The duration of assignments to be undertaken will vary and will be specified in the Assignment ToR.

L. Duty Station
