## **SECTION 5A: STATEMENT OF WORKS**

---

### **ITB-0000144080: Package # 4: Site Preparation and Crushing of Concrete Rubble**

The project aims at launching immediate removal of rubble and hazardous materials (asbestos and debris) generated by the IDF war on Gaza in May (around 150,000 tons), as well as transporting the same to an already established rubble crushing site in the Gaza area. Subsequently, the rubble will be processed to extract maximum value, while reducing the hazardous associated with uncontrolled dumping of construction debris. The project will utilize, to the extent possible, local labour managed and trained by special experts. UNDP will coordinate closely with UNMAS so that the rubble removal by UNDP enables UNMAS to eliminate hazards of UXOs (separate UNMAS project). UNDP will also coordinate closely with UNMAS to enable the latter to conduct risk assessment of damaged buildings and remove and dispose of such UXOs prior to rubble removal activities. In addition, crushing of 50,000 tons of generated rubble will be implemented in the previously prepared crushing and disposal site.
