### I. BACKGROUND & PROJECT DESCRIPTION

With its extensive coastline and deltaic plains, Viet Nam is considered to be among the most vulnerable countries to climate change globally. Extreme weather events such as typhoons and tropical storms have increased in intensity, magnifying socio-economic and health impacts on rural, urban, coastal, and mountain communities, and endangering critical transportation and drainage infrastructure. The Mekong Delta is one of the most susceptible deltas in the world to sea level rise. To address climate change, the Government of Viet Nam developed a series of national climate change, green growth, and sustainable development policies, strategies, and action plans. One key planning instrument is the GoV's National Strategy on Climate Change 2012-2020. To date, the government has been able to put in place several key climate change related decisions, including the landmark Plan for Implementation of the Paris Agreement in 2016 and approved its domestic National Adaptation Plan (NAP) in the year 2020. In addition, Viet Nam is among the first countries to have submitted its Updated Nationally Determined Contribution (NDC) to the UNFCCC in July 2020, which has a strong adaptation component.

The main readiness challenge in Viet Nam to effectively address climate change is the lack of capacity in government structures to effectively integrate climate change adaptation into plans and budgets at different levels and to design, operationalize, finance, and monitor adaptation actions. Barriers include lack of technical capacity to integrate data and information, and undertake assessments for adaptation planning, lack of capacity for appraising adaptation options in sector and provincial departments, ineffective inter-ministerial coordination, lack of active participation from private sector and local communities, lack of financing strategies, limited government and external resources, and lack of participatory and results-based monitoring and evaluation frameworks.

To address these barriers, the **Viet Nam National Adaptation Plan (NAP) Development and Operationalization Support Project (NAP-SUP)** is designed along the following outcomes:

- **Outcome 1:** Capacity for data integration enhanced and National Adaptation Plan (NAP)

prepared and aligned with NDC review;

- **Outcome 2:** National adaptation plan and CCA integrated into national, subnational, and sectoral development plans and budget of priority sectors with private sector participation; and
- **Outcome 3:** Participatory results-based monitoring and evaluation mechanism developed and operationalized.

These three outcomes and their associated activities will contribute to the overall objective of the project, which is to “*establish an effective system to integrate climate change adaptation into government administration processes in the priority sectors.*” The priority sectors to be addressed under this proposal are: Agriculture and Rural Development, Transport, Health, Natural Resources and Environment, and Planning and Investment.

To increase the inter-ministerial coordination to identify priority adaptation projects, the MPI, supported by UNDP, is working to strengthen mechanisms and approaches to identify and appraise adaptation-related investment opportunities. For this task, UNDP seeks one national consultant to strengthen the cooperation between MPI and other ministries; and identifying priority adaptation projects.

## II. OBJECTIVES

The main objective of the consultancy is to support MPI to strengthen the cooperation and coordination between MPI and other priority ministries to successfully implement Viet Nam’s NAP, while adequately identify priority projects to enable the mobilization of public (and private) budgets. The consultant is expected to work with experts from MONRE, MOT, MARD, and MOH, as well as a range of international and national consultants, who are also mobilized by MPI and UNDP.

The national consultant will more specifically be responsible to:

1. Review and assess current channels and mechanisms of cooperation and cooperation between NAP priority ministries related to climate change adaptation planning and budgeting processes;
2. Propose measures to strengthen the cooperation and coordination between NAP priority ministries;
3. Review and propose methodology to identify and select priority climate change adaptation activities/projects; and
4. Prioritize climate change adaptation projects/activities for each priority sector to successfully implement Viet Nam’s NAP.

## III. SCOPE OF WORK

The successful consultant will be expected to be responsible for the following:

To implement the objective, the consultant will work with MPI in Ha Noi and is expected to undertake the following activities during the assignment:

*Task 1: Plan, initiate, and maintain inter-ministerial stakeholder dialogues and mechanisms on strengthening the cooperation and coordination between NAP priority ministries to successfully implement Viet Nam’s NAP.*
