	b) if there is an error in a total corresponding to the addition or subtraction

		of subtotals, the subtotals shall prevail and the total shall be corrected; and
		c) if there is a discrepancy between words and figures, the amount in words shall prevail, unless the amount expressed in words is related to an arithmetic error, in which case the amount in figures shall prevail.

In the First Stage, the technical proposal is evaluated on the basis of its responsiveness to the Terms of Reference (TOR) and as per below Evaluation Criteria.

In the Second Stage, the price proposals of all offerors, who have attained minimum 70% score in the technical evaluation, will be reviewed.

Overall evaluation will be completed in accordance with cumulative analysis scheme, under which the technical and financial aspects will have pre-assigned weights on 70% and 30% of the overall score respectively. The lowest cost financial proposal (out of technically compliant) will be selected as a baseline and allocated the **maximum number of points obtainable for financial part (i.e. 300).** All other financial proposals will receive a number of points inversely proportional to their quoted price; e.g. 300 points x lowest price / quoted price.

The winning proposal will be the one with the highest number of points after the points obtained in both technical and financial evaluations, respectively, are added up. The contract will be awarded to the bidder that submitted the winning proposal.

I. PREAMBLE

The socio-economic impact of the COVID-19 pandemic has deepened the challenges faced by SMEs. Necessary measures to contain the virus through quarantines, travel restrictions, and cities' lockdown have resulted in a significant reduction in demand and supply. SMEs provide work for more than 4 million people in Ukraine and generate about 20% of GDP. Nevertheless, since the lockdown, the Ukrainian Chamber of Commerce and Industry estimated that 700,000 SMEs have closed. One-third of business owners (mainly micro-entrepreneurs) have claimed a 90-100% drop in revenue since quarantine and have laid off up to 50% of staff.

According to UNDP's socio-economic impact assessment (SEIA) in Ukraine, women who are the owners of a business were more likely to indicate that they had experienced "significant changes" in their business during the pandemic than men owners (64% vs 53%). The pandemic severely impacted women and entrepreneurs who are younger than 40 years old: 79% of women entrepreneurs reported negative effects of the crisis vs 68% of men, and 80% of young entrepreneurs vs 68% of older ones. In 2019, women-owned enterprises had a lower annual financial turnover than men-owned ones: 66% of enterprises owned by women had an annual turnover of less than UAH 1 million compared to 48% of men owners. During the pandemic, women owners indicated a decrease in their enterprise's monthly turnover more often than men owners (84% vs 78% male). The smaller the enterprise, the more likely it was owned by a woman. Micro and small enterprises were most affected as they depended on self-financing to mitigate the crisis.

In order to address the challenges mentioned above, the Project builds on the results of situation analysis and UNDP's experience and applies its efforts to the following areas:

• Support to small and medium entrepreneurship as one of the core economic lynchpins of Ukraine's economy, with particular attention to gender equality, empowerment and digital transformation.

• Search for tipping points in the application of digital transformation instruments to expedite business recovery.

• Commitment to furthering SDGs to address COVID-related threats.

The Project will target MSMEs in the agri-food and adjacent sectors with a focus towards women-owned or women-managed businesses: both family-operated and larger producers that have potential for development and guide their business towards better resilience and sustainability.

The Project intends to achieve the following outputs:

1. Women-driven MSMEs in agri-food and adjacent sectors have better capacity to apply resilient and sustainable business-models.

2. Ukraine's MSMEs, particularly those owned/led by women and representing agri-food and adjacent sectors, enjoy better access to business-development services, local and global markets and finances.

OVERALL OBJECTIVES AND TASKS

The overall objective is to raise the awareness of women - MSME leaders in the agri-food sector about the best innovative management practices in the sector through several interrelated processes: short-term distance learning, consulting support to each of the Project's participants in accelerating their own businesses with implementation of innovative sustainable business models (120 participants), administration of a competitive program among the participants to receive individual consulting support for the practical implementation of the developed project (40 participants).

This will require the following:

- conduct a selection campaign to attract 120 participants to the training program. This will require development of selection criteria, and their concurrence by UNDP, reaching out to the target group, and a selection of best participants among at least 200 candidates;
- study typical challenges faced by MSMEs of selected participants, and develop a training plan aimed at developing leadership skills and professional competence of women leaders of MSMEs in the agri-food sector for overcoming the challenges with the help of innovative business tools;
- Streamline the training process such as to be of the most practical and applied nature, and build it around the development of a realistic Project ensuring sustainability of their own business with the help of modern business tools. This will require arrangements for a coaching process by the Contractor for the training participants;
- administer an internal competition among participants for the best 40 projects to accelerate their own businesses with implementation of innovative sustainable business models, the winners of which will receive consulting / coaching support for the implementation of developed projects.

The training program should only assume distant learning.

II. SCOPE OF WORK AND EXPECTED OUTCOMES

GENERAL PRINCIPLES FOR THE DEVELOPMENT AND IMPLEMENTATION OF THE TRAINING PROGRAM

- The training program should be based on the principles of adult learning, and be aimed at developing practical skills of the participants, who will further use them in development of their own businesses.
- The program should be based on a competency-based approach to learning. The program should particularly address development of skills and competencies that will help participants function as leaders, members of supervisory boards, executive directors, etc.
- The training should combine theories and methodologies based on relevant processes and skills, and highlight specific cases and practices.
- The program should include possibilities and specific facilities / events to help learn and implement best Ukrainian and international practices of operation and development of agri-food MSMEs: lectures, meeting with Ukrainian and international experts, representatives of leading Ukrainian and international companies in the agri-food sector.
