1	Can Installation, Startup, Coaching on operation for Lot 1 to be done online (as per Lots 2 & 3)?	UNDP confirms that the Installation, Startup and Coaching on operation for Lot 1 equipment (just like the other two Lots) in online format is acceptable as well.
2	<p>1. Dryer machine: How about the raw material moisture? 30% or 40% or 50%.....?</p> <p>2. Briquette machines: For the 380-450 kg/h capacity, could you accept 50mm or 60mm square shape with center 20mm hole?</p> <p>3. Carbonizer: What's the usage of this machine? To carbonize the briquette into charcoal? Or other usage?</p>	<p>1. Initial raw material moisture – 35~40%, after aerodynamic dryer should be – 10~15%.</p> <p>2. Briquette machines with 380~450 kg/h capacity and 50~60mm square shape parameters are acceptable. The only requirement is the availability of spare parts (or post-sale service) – wear-resistant screw propellers.</p> <p>3. Carbonizer is aimed to convert ready briquettes from wood wastes into charcoal, which is also widely used in food cooking.</p>
