Terms of Reference for International Short-Term Expert for the Technical Visit to Finland Within the Scope of Strengthening the Civilian Oversight of Internal Security Forces Phase III Project (CO III)

1 Background

The Projects for the Civilian Oversight of Internal Security Sector have identified the main requirements for an effective and human centred civilian oversight mechanism over the internal security sector. Building on the recommendations and results of the former phases, the 3rd Phase of the Project at hand is designed to deepen Phase I and Phase II results. This new Phase will also support the Government in establishing the best model for ISFs and its effective functioning under MoI, in line with international principles and best practices in the EU. This new Phase is in conformity with the priorities of the Accession Partnership and EU/Commission policies by supporting the ongoing work of Turkey. Assessment of various progress reports of the European Commission along with the policy endeavours of Turkey to address gaps in the civilian oversight and the outputs of the partnership of Turkey jointly achieved with UNDP and the Delegation of the European Union to Turkey (EUD) are the basis of the Project. The Project (CO III) is accepted under the 2014 Action Document for Fundamental Rights Sub-Field prepared by the Directorate for EU Affairs (DEUA) Department of Political Affairs under the Ministry of Foreign Affairs as the Lead Institution. The target groups are the Ministry of Interior, including provincial administrations and ISFs, and the Grand National Assembly of Turkey. The MoI Department of Smuggling, Intelligence, Operations and Data Collection is the main beneficiary of the Project, whereas UNDP will provide technical assistance to the MoI for efficient and effective implementation of the Project. The Project is composed of 4 components:

Component A - Legislative and Institutional Framework: This component aims to improve, the training curriculum, strategies and the basic legislative and regulatory framework governing the Police, Gendarmerie and Coast Guard as well as the Local Security System in the light of civilian/democratic oversight and accountability principles. It is also planned that the performance evaluation system of MoI over ISFs will be strengthened through the Project.

Component B - Parliamentary Oversight: This component aims to develop a strategy to systematically oversee the work of ISFs through the work of relevant Commissions of the Grand National Assembly of Turkey.

Component C - Scaling Up of the Pilot Security Governance Structures: This component aims to scale up the pilot security governance structures nationwide and support their effective functioning through capacity development and technical assistance.

Component D - Individual and Institutional Capacity Building: This component aims to build institutional and individual capacities of the Governors, District Governors and citizens to enhance the understanding and internalisation of citizen-focused security services.
