

<b>Addendum No.1 Clarifications and responses</b>	
<b>RFQ Reference: UNDP/AFG/RFQ/2021/ 0000010403</b>	
<b>Title: Supply, delivery and Printing of Stickers (QR Codes) for COVID-19 Vaccine Tracking Application Development</b>	
<b>Bidder Clarifications</b>	<b>UNDP Response</b>
1- Please clear the quantity, whether 34000 A4 or total of small size well be 34000?	It will be 34000 A4 which makes 1,020,000 QR codes. This means in each A4 page, there would be 30 QR codes.
2- Could you please provide us its samples, whether four color or one color?	It is only one color (black)
3- One QR code would be printed or efferent kinds?	Different QR codes, each QR code is unique. In fact we will give them 34000 pages of PDF and they will simply print that. Like printing one copy of a book with 34000 pages. (each page will have different QR codes).
4- Would you agree, if we would cut all of them in 3.5 x 3.5 cm sizes and make them bundles?	Ideally, they should be in pre-cut A4 or any other size stickers with good pasting quality. We need to see the samples before proceeding.
<p>We would like to take action as soon as possible and present our offer to you.</p> <p>In this regard, the following questions have arisen for us:</p> <ul style="list-style-type: none"> <li>• Are there any basic material specifications for the product? (printing material, colour preferences)</li> <li>• Are there any design templates that we can follow?</li> <li>• (Perhaps you wish further security features besides the QR code, imprint material - also with regard to perforation)</li> </ul>	<p>Please see attached file (QR codes overview(1) for details. It is only in black on white paper. See the sample attached.</p> <p>For design, please see attached pdf file (QRtypo.pdf)</p> <p>No further security required.</p>

*Nahid Khan*

Yours sincerely,  
Head of Procurement
