INDIVIDUAL CONSULTANT PROCUREMENT NOTICE

Date: 15th Sep 2021

Country: Jordan

Description of the assignment: Individual Consultant: Civil Engineer to supervise the Works Required to establish a Compost plant facility in Al Koura District

Project name: Women Economic Empowerment Project

Period of assignment/services (if applicable): 3 months (10th Oct 2021 – 30th Dec 2021)

Proposal should be sent by e-mail to ic.jo@undp.org no later than [9th of October 2021].

Any request for clarification must be sent in writing, or by standard electronic communication to the address or e-mail indicated above. [The procuring UNDP entity] will respond in writing or by standard electronic mail and will send written copies of the response, including an explanation of the query without identifying the source of inquiry, to all consultants.

1. BACKGROUND

The “Enhancing Women Participation in the Solid Waste Management Sector in Jordan” project contributes to improving women’s quality of life in North of Jordan through enhancing their livelihoods and wellbeing. The entry point of this project is women’s economic empowerment and equality as means to addressing barriers that are hindering women from active participation in their communities as workers, entrepreneurs and change makers, with the understanding that real women’s economic empowerment exists when women and girls have similar opportunities to men and boys in terms of knowledge, economic opportunities, gender sensitive policies and decision-making power and access to and control over assets and resources.

The Project focuses on empowering women through improving effectiveness of women organizations to actively represent and support women voices in decision-making processes, increasing participation by women in the local economy, enhancing gender informed and responsive policy making at community and national levels, with particular focus on the Solid Waste Management (SWM) sector.

The project targets women in three municipalities which comprise Northern Shouneh District and an additional municipality (within Kourah District) all in Irbid Governorate. According to the census of population and housing results 2015, the demographic and socio-economic data of the Northern Shouneh district shows that women are 46.4% of the total population while men are 53.5% with a gender gap of 7.1% in favor of men. Moreover, number of households in the Northern Shouneh is
24,659 households, and average family size is 5.8 which is considered high in comparison to the national family size average of households which is 5.5 (according to Ministry of Planning and International Cooperation poverty pocket Socioeconomic profile for Northern Shouneh). Social indicators show that male-headed households comprise 87.8% while female-headed households comprise 12.2%.

This project is designed to use the UNDP niche and experience in the solid waste management to provide interventions aiming at empowering women economically, strengthening their voice and representation at the local level, and enhance the institutional capacities to accompany this process. Furthermore, this project will benefit from UNDP global and regional experience in implementing such projects. It will also link and build on other relevant interventions implemented by other international organizations, government, and others.

The Project will secure as an end result job opportunity for 600 women through green business group projects in the SWM sector, in addition to further capacitating 46 women from an existing project. It will also target women in the communities and within the CSOs for other support.

The project is implemented through partnership with the Ministry of Local Administration (MoLA) and the Joint Services Council of Irbid (JSC-Irbid); who are the main project beneficiaries as well as the civil society in northern Jordan.

Under this framework and following site visits and technical evaluation of the current situation, a Construction of a new building will take place to establish a composting processing and packaging center as well as a sorting facility (steel structure – hanger) as per the design drawings and specifications provided by experts in the earlier designing phase. The composting and sorting facility which are currently under construction located in Deir Abi Saed, Irbid, north west of Jordan near to and adjacent to the Jordanian valley area, where the site is owned by JSC-AL Koura and managed by JSC-Irbid management.

2. SCOPE OF WORK, RESPONSIBILITIES AND DESCRIPTION OF THE PROPOSED ANALYTICAL WORK

[Provide a brief description of the assignment or refer to the Annex covering the TOR]

Under the overall guidance of the Women’s Economic Empowerment Project Manager, and direct supervision of the Construction Manager, and in coordination with the technical supervision of the Project Management Units at the Ministry of Local Administration (MoLA), the Civil Engineer Consultant will be directly responsible for the successful completion of the below set of tasks within allotted, agreed-upon time frame:

The Consultant’s main task shall be to supervise the construction activities on daily basis that will take place in Deir Abi Saed transfer station to build a composting and sorting facility. The Consultant has to ensure that the Works are carried out in accordance with the contract documents, consistent with internationally accepted engineering standards and practices.

The Services shall also include some duties normally performed by UNDP field staff, which includes the establishment and maintenance of contacts with counterparts and other stakeholders, liaisons, coordination, and similar activities. Hence, the consultant has to assist the UNDP’s staff in the examination of officially handed documents, supervision and formulating opinion about the modifications and supplements proposed by the contractors.
Upon site handover to the contractor, the Consultant shall take charge and be responsible for managing, supervising, monitoring, verifying, certifying, amongst other activities, on behalf of UNDP, that will be related to the handing over of the site.

Summary of key functions and expected results:

I. Ensures Construction Works are supervised and monitored.
II. Support implementation of Construction Works and operationalizing the Compost processing and Sorting Facility.
III. Support implementation of the Construction Works and operationalizing the Compost processing and Sorting Facility.

For detailed information, please refer to Annex 1

3. REQUIREMENTS FOR EXPERIENCE AND QUALIFICATIONS

Academic Qualifications:

☐ Bachelor’s degree in Civil Engineering. A master’s degree in a related field is a plus.

Years of experience:

☐ Over 5 years of working experience in a relevant field of civil engineering, especially in preparation of construction technical documentation; and Structural design;

Competencies:

Leadership: Actively shares knowledge;

Communication and Relationship Management: Communicates ideas and positions with command and confidence;

Innovation: Critically assesses established methods;

People Management: Demonstrates behaviors of teamwork, collaboration, knowledge sharing, maintaining relationships;

Delivery: Embraces complex challenges and opportunities for getting work done;

Works to develop organizational awareness of UNDP’s approach to client service delivery and integrity and accountability

Other Competencies:

- Proven ability to work with a variety of people including community members, in particular women and youth; government officials, local stakeholders.
- Excellent communication, presentation, and facilitation skills.
- Competency in the use of standard Microsoft computer packages is essential.
4. DOCUMENTS TO BE INCLUDED WHEN SUBMITTING THE PROPOSALS.

Interested individual consultants must submit the following documents/information to demonstrate their qualifications:

1. Proposal:
   (i) Explaining why they are the most suitable for the work
   (ii) Provide a brief methodology on how they will approach and conduct the work (if applicable)

2. Financial proposal

3. Personal CV including past experience in similar projects and at least 3 references

5. FINANCIAL PROPOSAL

   - **Lump sum contracts**
   The financial proposal shall specify a total lump sum amount, and payment terms around specific and measurable (qualitative and quantitative) deliverables (i.e. whether payments fall in installments or upon completion of the entire contract). Payments are based upon output, i.e. upon delivery of the services specified in the TOR. In order to assist the requesting unit in the comparison of financial proposals, the financial proposal will include a breakdown of this lump sum amount (including travel, per diems, and number of anticipated working days).

   - **Travel:**
   All envisaged travel costs must be included in the financial proposal. This includes all travel to join duty station/repatriation travel. In general, UNDP should not accept travel costs exceeding those of an economy class ticket. Should the IC wish to travel on a higher class he/she should do so using their own resources.

   In the case of unforeseeable travel, payment of travel costs including tickets, lodging and terminal expenses should be agreed upon, between the respective business unit and Individual Consultant, prior to travel and will be reimbursed.
6. SHORTLISTING

☐ Shortlisted will be based on the following:
