<p>42. <i>Bank Guarantee for Advanced Payment</i></p>	<p>42.1 Except when the interests of UNDP so require, it is UNDP's preference to make no advance payment(s) (i.e., payments without having received any outputs). If an advance payment is allowed as per BDS, and exceeds 20% of the total contract price, or USD 30,000, whichever is less, the Bidder shall submit a Bank Guarantee in the full amount of the advance payment in the form available at https://popp.undp.org/layouts/15/WopiFrame.aspx?sourcedoc=/UNDP_POPP_DOCUMENT_LIBRARY/Public/PSU_Contract%20Management%20Payment%20and%20Taxes_Advanced%20Payment%20Guarantee%20Form.docx&action=default</p>

SECTION 5. TERMS OF REFERENCE

1. INTRODUCTION

UN in Botswana is inviting local ISP's to propose highspeed reliable internet services. The objective is to ensure a high level of redundancy through alternate breakout points to those currently used by our existing ISP, bypassing Botswana-Namibia Route

We require evidence of diverse routing, to protect against cable failure locally and internationally.

- i. the service provider should protect against local and international exchange failure with two separate routes from two exchanges to our four sites (UN Building, UNICEF, WHO, Tsabong Project, Dukwi office)
- ii. Two separate last mile links to each site: (ie: fiber and radio)
- iii. We would like service providers to fully indicate and demonstrate how the diverse routing will be put in place for this service. The service provider must submit proof that indeed they have two separate routes out of the country and Proof of partnerships with independent international major carriers and given that UN traffic is significant, the ISP must indicate how their hand-over points span within the international network routes.

UN BOTSWANA INTERNET REQUIREMENTS

Table 1: Summary UN Botswana Internet Requirements

Requirements	Description
Dedicated Internet	Need full duplex dedicated, 1:1 contention ratio. e.g. 30Mbps Downloads and 30MBps Upload. Refer to 2.1 Capacities / Last mile sought below
Increased Reliability	Need highest levels of Internet availability, the ISP should provide dual node connectivity so that there is very limited downtime (.5%) should a service disruption occur at any IP gateway and the ISP must demonstrate available routes
Scalability	High fault tolerance network that allows for growth and upgrades to be performed with no or very little impact to the UN.
Flexibility	There is need for a diverse choice of bandwidth options so that during special occasion or should need be the ISP can provide bandwidth on demand for a predefined period.
Service Level Agreement	Service and uptime of the dedicated Internet should be enforced through an SLA which offers punitive measures.
Value Added Services	The ISP must be able to provide a range of value-added services that include Network Monitoring software's, Domain and website hosting services, cloud hosted services, QOS, COS etc.
B/width Monitoring & Reporting Tools	Realtime Network Monitoring Software that would deliver detailed reporting and graphing with historical reporting of minimum 12 months. Ideally with Layer 3 and 7 reporting functionalities of usage over time per protocol.
Service Reports	The ISP must provide monthly service reports including usage and availability reports; ideally these should be emailed to key persons within the UN on a regular interval. Critical outage detailed reporting within 48 hours of a major outage. Automatic incident report notification. Refer to SLA for detailed expectations.
Round the clock Support	The selected ISP should provide 24*7*365 experienced technical support.

Customer Service quality service delivery	The ISP Key Management will attend annual quality of service review meetings with key UN Management, and other quality of service meetings as needed.

CAPACITY
10Mbps up/10Mbps down
20Mbps up/ 20Mbps down
30Mbps up/ 30Mbps down
40Mbps up/ 40Mbps down
50Mbps up/ 50Mbps down
100Mbps up/ 100Mbps down

The current requirement is:

- 35Mbps UN Building, Govt. enclave
- 20Mbps UNICEF – 1st Floor, 106, Matsitama Road, Plot 27
- 10 Mbps WHO – MVA Building, Fairgrounds, Gaborone

- 10 Mbps UNHCR – Dukwi

2.2 General Network Availability Level

The general network availability level is measured from UN Botswana routers to the internet. Contractor will ensure that general network availability level at each access router is no less than 99.5%, measured weekly, this excludes planned shutdown for maintenance/upgrades and break down of equipment at sites.

The Contractor will also provide a real-time graphical monitoring and reporting dashboard to UN ICT for bandwidth usage monitoring, capable of layer 7 reporting. Furthermore, monthly reports for all sites should be provided together with monthly invoice submissions.

The following services are required/expected:

a) Round Trip Time

Round trip time also known as latency measures round trip time (rtt) between the site and internet, UN Botswana will measure latency from UN Botswana network (not fully utilized network) to the internet to measure the latency and UN Botswana expects at all times 80ms or below latency for Botswana IPs, and under 300ms for US/Europe hosted IPs i.e.: UN servers, Microsoft and Google data centers located in Europe, US, Middle east.

International/Local traffic:

ISP should provide prove information on their IXP (local and international peering)

ISP provide proof handling national traffic routed within local BGP (local IXP)

b) Packet Loss

- Packet loss will be measured by sending IP packets from UN Botswana router at random to the internet
- The IP Packets will then be counted, a loss figure determined, and the percentage loss calculated, these percentages will be averaged for each week
- Contractor shall use best efforts to ensure that the average packet loss for any week is no greater than 1%.
- Contractor shall provide access through MRTG (or similar product) for all locations to check the utilization graph and keep the data available for one year.

c) Service Credits

Any downtime over and above the time period specified, as above, shall be considered as network downtime and will qualify for credits. Contractor will be liable for Services Credits equal to 2% cost of invoice for any 1% service downtime for each week.

Contractor will send service credits report to UN Botswana focal points by the end of each month, it is the responsibility of UN Botswana focal points to check and verify the report and inform to Contractor if there are any inconsistencies with 15 days of the receipt of the report. Service credits will be paid to UN Botswana in the following month of each month measured.

No credit allowance will be made for:

- Interruption caused by the intentional or scheduled/unscheduled shutdown on the part of the UN Botswana, its Contractor's, any local access provider or any other entity over which the UN Botswana exercises control or has the right to exercise control.
- Interruptions due to failure of power, equipment, service or systems not provided by Contractor (within UN Premises)
- Interruptions during any period in which Contractor or its agents are not afforded access to the premises where the access lines associated with the UN Botswana's service are terminated.
- Interruptions during any period when UN Botswana has released service to Contractor for maintenance or rearrangement purpose, or for the installation of a UN Botswana service order
- An interruption during any period when the UN Botswana does not release the service for testing and/or repair and continues to use it on an impaired basis.
- Packets dropped at infrastructure egress due to improper UN Botswana specifications of UN Botswana port speeds.

- Contractor shall not be liable for non-performance or delay in performance of any obligation stipulated in this document, if such non-performance or delay is caused by an event of force majeure that materially impairs its ability to perform its obligations. Contractor shall give prompt notice to UN Botswana advising of the occurrence and effects of the event and shall use all reasonable efforts to minimize any adverse consequences. Neither party shall be liable for any delays nor failures to perform brought about by such force majeure.
