## SECTION 5. TERMS OF REFERENCE

---

### a. Background Information and Rationale, Project Description

Waste management has always been an issue in Indonesia due to growing population and increasing amount of waste that the population produces. According to 2019 data from the Ministry of Environment and Forestry, Indonesia produces around 64 ton of waste annually of which 60 percent is dumped at landfills, only 10 percent is recycled and the other 30 percent is unmanaged and contaminates the environment<sup>2</sup>, many of which will end up in the sea. Indonesia aims to be able to manage 100 percent of its waste by 2025<sup>3</sup> through several efforts such as reducing plastic waste ending up in the sea by 70 percent, increasing awareness on the issue of waste management, training local community on waste sorting, increasing recycling rate, and increased efficiency on the existing waste processing facilities.

To achieve such an ambitious plan, UNDP through Response Towards COVID-19 Resilience (RESTORE) Project intends to support the Indonesian government by developing a prototype of waste prevention and management in traditional markets in urban areas. RESTORE project intends to strengthen the capacity of micro, small and medium enterprises (MSMEs) in local traditional markets to be more resilient during and post-COVID19 and align it with the Indonesian government's focus on circular economy through the implementation of prototyping waste management solutions in traditional markets.

COVID-19 pandemic has left a deep impact to the Indonesian economy and particularly for the MSME sector where many are struggling to keep their businesses open during the pandemic due to strict COVID-19 prevention protocols implemented by the government. However, the role of MSMEs in expediting Indonesian economic recovery is particularly important. According to the Ministry of Cooperative and Small Medium Enterprises, in 2019 MSME sector absorbed almost 97% of total workforce in Indonesia and it contributes around 60% of Indonesia's GDP<sup>4</sup>.

In addition to that, MSMEs are interested in environmentally-friendly and inclusive business practices while maintaining safe business practices to prevent the spread of Coronavirus as shown in the 2021 MSME survey conducted by UNDP in collaboration with the Ministry of Cooperatives and SME and telecom provider Indosat Ooredoo. Still, MSMEs often lack knowledge and need guidance on several issues such as waste prevention and management as well as sustainable and inclusive business practices to contribute to circular economy.

Against the backdrop mentioned above, the proposal will mainly focus on the following:

1. to identify the problem and needs as well as map stakeholders involved in the waste management of selected traditional market/s;
2. to provide an effective and sustainable ecosystem solution for waste management in traditional markets based on circular economy approach/concept, through multistakeholders collaboration in which MSMEs are empowered to play an active role;
3. to provide MSMEs that are part of targeted traditional market with appropriate training on waste prevention and management based on circular economy approach;

## **b. Specific Objectives**

The objective / purpose of the service is first to reduce the number of unprocessed waste produced by the local traditional markets and promote increased awareness of MSMEs in and around the traditional market that will transition them into more sustainable, green and inclusive business practices while implementing COVID-19 prevention protocols in all of its business processes. Target location of the traditional markets will be those in Jakarta , Bandung and Surabaya semi-urban metropolitan areas.
