SLE/ICPN/SLED/2022/006: National Consultant, Development of National Strategic Framework for the Blue Economy

1

1. BACKGROUND

Harnessing the potentials of the oceanic economy, also known as blue economy, has emerged as a crucial development opportunity for optimum use of the oceans, seas, and marine resources for sustainable development. Accordingly, the Sustainable Development Goal -14 "Life below water" focuses on sustainable use of the oceans, seas, and marine resources for sustainable development. Ocean assets provide food and energy which are essential for human survival. By overlooking the potentials of the oceans, it is difficult to achieve sustainable economic development by 2030. Given this, the Government of Sierra Leone has embraced the emerging concept of the Blue Economy as a mechanism to diversify its economy and realize ocean-based sustainable economic development.

Although Blue Economy has prospects to contribute to Sierra Leone's economy immensely, there is currently no standalone strategic framework or roadmap to guide its exploitation. Consequently, the country has explored only a few Blue Economy sectors such as fisheries, tourism, and port facilities, using traditional methods. This, thus presents opportunities as well as challenges for exploring these blue economy sectors, including the fishery, maritime trade and shipping, energy, tourism, coastal protection, aquaculture, mining, maritime safety, and surveillance, addressing environmental changes and managing carbon discharge, and introducing innovative technology for further development to contribute to achieving sustainable development goals.

Considering the above, the UNDP through its Natural Resource Management (NRM) portfolio, is supporting the Government of Sierra Leone develop and adopt steps to enhance the sustainable use of its ocean, seas, and marine resources to attain inclusive development. To achieve this, the UNDP collaborates with the relevant government MDAs to develop and approve a Strategic Framework for Harnessing the Blue Economy. This is expected to be an integrated approach to ocean-based sustainable development which brings together economy, environment and society, consistent with the Sustainable Development Agenda 2030 (SDG'14). The Sierra Leone Blue Economy Framework will require the definition of short, medium, and long-term actions across a broad range of sectors as well as require fundamental changes to the traditional institutional arrangements that exist to support marine sector resource management in Sierra Leone.

It is against this backdrop, that the UNDP hired the services of **2** consultants (1 national consultant and 1 international) who supported the development and submission of a Draft National Blue Economy Strategic Framework for harnessing the Blue Economy through a national consultative process, including desk reviews.

Following this submission, and subsequent discussions at the Technical Committee level, it is critical that the current document is reviewed and synthesised into a concise and bankable National Blue Economy Strategic Framework. The call for this Intensive Technical Review and Finalisation of the strategy is informed by the need to incorporate emerging needs and to ensure that the final document reflects realities in all blue economy-related sectors, whiles engendering national ownership. The final draft strategy will reflect an inclusive and integrated approach to the Blue Economy management that would guide policies going forward.

In this regard, the services of a National Consultant are required for a minimum of 15 working days to support the process, including working with the Ministry of Planning and Economic Development to consolidate the various inputs

and produce the final strategy document
