| 1         | On page 13- Section 9.5, it has been mentioned that the Number of Internal Hard Disks for Operating System (OS) to be mirrored is one (1). Kindly confirm number please? According to our technical team it should be two (2). | a) The number of fixed internal hard disks for OS (including disks to be mirrored) is two (2)  
b) It is a classic RAID 1 mirrored pair with two (2) disks. All data in the primary drive is copied to the secondary drive. Thus, the number of mirrored disks for OS is one (1) by using the two (2) fixed internal hard disks |
| 2         | Kindly confirm level of support required please? Is it 8 x 5 or 24 x 7? | The bidder may provide a separate costing for an annual Hardware Support and Maintenance Service under 8 x 5 basis. This would not form part of the cost of the server and bidding price. The signing of the Hardware Support and Maintenance contract (inclusive Preventive & Remedial Maintenance) would be optional. |
