<b>General Notes:</b> 1 - The cost for all items below includes supplying of materials, machineries, equipment, transportation, installations, spare parts, accessories, auxiliary materials, and any other needed works and materials, relocation of any existing items/services which come under work to any new location guided by UNDP Engineer, removal/salvage/disposal of any existing structure that needs to be removed/salvaged/disposed, reinstating of all affected areas and their surroundings after the work to their original states, all wilding works, hardware, any other needed works and materials to complete the job to the full satisfaction of UNDP Engineer. 2 - Samples for all types of equipment, appliances, materials and accessories that need to be used in this contract shall be brought to the approval of UNDP Engineer before using them in the job. 3- Cautions: the minimum well discharge requirement is Q>60 Liter/minute for at least 48 hours continuous test period of the well. This well will be called "Successful Well "In case of any failure to this amount of discharge, the well is called 'failed well' and there will be NO PAYMENT for a failed well. So, evaluation and reading of SURVEYING REPORT for the water well is the most important step before any other steps to be taken. 4- Any additional attempts to find out and re-bore extra wells until to find a successful well during this contract is part of the same approved BOQ and no payment will be issued by the name of more attempts or more wells etc. 5- Read given all project documents before pricing the job. Material availability and changes of market prices for any material is to the responsibility of the Contractor without any extra payment. 6- In practical work, there may be about 5% variation in the design/size/quality/quantity of different parts of the work mentioned in the BOQ; all such changes shall be applied in the work without any extra payments. Only those vast changes in the design can be paid as an extra money that have already been approved by UNDP Engineer. (In the case of big changes in the scope of work, there must be a written agreement between Contractor and UNDP Engineer on the agreed extra scope along with their prices prior to start the additional works)

See above General Notes for the "successful well" term). Strata data should be provided per meter depth or per layer changing.</p> <p>Cost for this item includes all process of well-capacity tests required to proof the well is "Successful well". See General Notes for well capacity requirement (&gt;60 liters/minutes for at least 48 hours continuous pumping).</p> <p>The cost includes preparation of reports and diagrams at the end of work about geological condition of the well, yield of well, ground water level etc. Consult Engineer for details of this item.</p>
