TERMS OF REFERENCE
INDIVIDUAL CONSULTANT

Ref#: UN28/Activity 1.4 (50%) & 2.1 (50%)

Name of service: Junior National Consultant for supporting implementation the project activities

Project: Strengthening the resilience of smallholder agriculture to climate change-induced water insecurity in the Central Highlands and South-Central Coast regions of Vietnam

Reporting to: Programme Management Specialist/ UNDP Project manager, GCF2-SACCR

Duty Station: Hanoi

Travel Required: Click or tap to specify Yes/No.

Duration of Assignment: 216 days

Start Date: 7/18/2022

End Date: 7/17/2023

I. BACKGROUND & PROJECT DESCRIPTION

Viet Nam is particularly vulnerable to climate change and already impacted by more irregular and intense climate variability and change. Two of the regions most vulnerable to droughts-exacerbated by climate change affecting smallholder farmers are the Central Highlands and South-Central Coast. Changes in precipitation are leading to increasing deficits in surface and ground water availability for agricultural production with longer periods of severe water scarcity during the dry season and increased frequency and intensity of droughts. Overall agricultural productivity is falling, with corresponding declines in yields and incomes particularly harmful to small-scale farmers vulnerable to reduced water availability on rain fed lands and within this group, poor and near-poor, ethnic minority and women farmers.

UNDP is collaborating with the Ministry of Agriculture and Rural Development (MARD), Ministry of Planning and Investment (MPI, as the GCF National Designated Authority), and the five participating provinces of Dak Lak, Dak Nong, Binh Thuan, Ninh Thuan, and Khanh
Hoa to implement the GCF-financed project “Strengthening the resilience of smallholder agriculture to climate change-induced water insecurity in the Central Highlands and South-Central Coast regions of Vietnam” (herein after referred to as “the GCF2-SACCR Project”).

The objective of this project is to empower vulnerable smallholders in five provinces of the Central Highlands and South-Central Coast regions of Vietnam – particularly women and ethnic minority farmers – to manage increasing climate risks to agricultural production. To achieve its objective, the project will enable smallholder farmers to adapt to climate-driven rainfall variability and drought through implementation of two linked Outputs integrating GCF and co-financing resources from the Asian Development Bank and the Government of Vietnam:

1. improved access to water for vulnerable smallholder farmers for climate-resilient agricultural production in the face of climate-induced rainfall variability and droughts, and
2. strengthened capacities of smallholder farmers to apply climate and market information, technologies, and practices for climate-resilient water and agricultural management.

The project was developed as part of an integrated programme funded through multiple sources, as envisaged by the Government of Vietnam (GoV), that was aimed at enhancing water security and building the change resilience of the agriculture sector focusing on Vietnam’s Central Highland and South-Central Coastal Regions. In alignment with this programme, the project will enable the GoV to adopt a paradigm shift in the way smallholder agricultural development is envisioned and supported through an integrated approach to agricultural resilience starting with planning for climate risks based on identification and analysis of agroecosystem vulnerabilities; enhancing water security and guaranteeing access; scaling up adoption and application of climate-resilient agricultural practices and cropping systems; and creating partnerships among value chain stakeholders to ensure access to market and credit. This approach directly addresses climate risks while also establishing or strengthening institutional capacities for long-term multi-stakeholder support to vulnerable smallholders.
