Section 5. Terms of Reference

Setup of three model farms to address the needs for sustainable livelihoods and to promote sustainable agricultural practices in Qayara, Bashiqa and Ba'aj, Ninewa - Iraq

1. Background

Agriculture is the livelihood of an estimated 11 % of Iraqi families (WFP, CSO, KRSO 2017); it contributes to 5,89% of the GDP in 2020 and where 29% of the Iraq population are working in rural areas¹². Among the agricultural households, roughly 75 % of them engage in crop production as a major source of income, while the remainder rely on livestock or mixed crop and livestock activities (Lucani 2012).

Agriculture is one of the most important sectors in Iraq after oil and gas. Agricultural workers are estimated to make up 20% of the workforce in the country. However, agriculture is mostly practiced on small farming units, and it is a low-input, low-output system. Low agricultural productivity has been a characteristic of Iraq's agriculture for long term and has made the country dependent on imports to meet its domestic food needs. The agriculture sector has also suffered due to food import policies that have encouraged the import of cheap food which has driven prices down and negatively impacts farmer. Most of small farmers in Ninewa and Kirkuk grow vegetables and fruits as an important source of income due to high market demands (NRC 2021). However, according to directorates of agriculture in the region, cultivating similar produce at the same time increases supply to an extent where fresh produce is wasted. An environmentally friendly solution for this is suggested to be sun-drying of fruits and vegetables. In addition to that, encouraging development of local packaging efforts and access to larger markets.

This intervention is developed under the framework of UNDP Funding Facility for Stabilization (FFS) Programme that aims at deterring the re-occurrence of violent conflict in Iraq. It was determined that the most effective and efficient way to do so was to expedite the return of the displaced people of Iraq to their homes immediately following liberation, and to support them in moving towards having different facets of their lives return to normal. This project will focus on the setup of three pilot model farms to address the needs for sustainable livelihoods and to promote sustainable agricultural practices. The target farmers will be supported through skills development, access to assets, in infrastructure and finance within the agriculture and housing sector. The interventions will mainstream conflict-sensitive approaches to all programming to address the underlying challenges of exclusion, marginalization and societal divisions and to contribute to addressing key drivers of conflict, particularly regarding strengthening the peace-dividends.

2. Project Description

The project aims to provide integrated support and enhance the return to the project target areas by addressing the two main barriers to returns - access to livelihoods opportunities and housing. Thus, to setup three model farms that address the needs for sustainable livelihoods and promote sustainable agricultural practices.

1. Provide infrastructural support for return of farmer families through rehabilitation of housing structures
2. Provide agricultural infrastructure and assets to enhance sustainable livelihoods such as water wells, solar power, polytunnel, drip irrigation system, hydro/aeroponics and other tools
3. Provide access to learning and coaching through agricultural, agri-business management skills and access to market for more durable, cost-effective and environmentally friendly agricultural practices

***The project activities should take into consideration the COVID-19: Emergency Livelihoods Cluster Response (Technical Guidance, Key Messages, Tools & Resources).**

***The training sessions should have dedicated sessions on Health and Safety (HSE) related to the topic of learning.**

3. Scope

- f. Geographical coverage: Qayara, Bashiqa and Ba'aj, Ninewa - Iraq
- g. Timeline: The project activities should be over **7 months** period.
- h. Target group and beneficiary selection: Pre-identified farms by UNDP through a set of criteria

The successful bidder should leverage previous value chain work done by UNDP and/or other agencies and address the gaps.

The overall outputs and key activities of this project are:

Output 1: Provide infrastructural support for return of farmer families through rehabilitation of housing structures

3 pre-identified farms will receive support with rehabilitation or reconstruction of conflict-affected housing structure and utilities to ensure sustainable return and durable reintegration of families. Each farm will be supported with an amount not exceeding 5,000 USD

Activity 1.1 Building on UNDP's rapid needs assessment, a detailed housing needs assessment will be conducted for each farm, in direct coordination with UNDP engineering team and farm owner.

Activity 1.2 A detailed rehabilitation plan, including cost estimations and BoQ to be developed. The BoQ has to be reviewed and approved by UNDP

Activity 1.3 Procurement of service provider and initiation of rehabilitation works

Activity 1.4 Completion of rehabilitation works, followed by quality check and handover to end-user after UNDP's approval

Activity 1.5 A construction warranty period of up to 2 months must be in place for specific sections and items

Output 2: Provide agricultural infrastructure and assets to enhance sustainable livelihoods such as water wells, solar power, polytunnel, drip irrigation system, hydro/aeroponics and other tools

3 pre-identified farms will receive support with agricultural infrastructure (rehabilitation or new construction) that will help enhance their livelihoods in reducing costs and increasing income. Each farm will be supported with a total amount not exceeding 80,000 USD

Activity 2.1 Building on UNDP's rapid needs assessment, a detailed agricultural infrastructure needs assessment will be conducted for each farm, in direct coordination with UNDP engineering team, agricultural expert and farm owner. The main focus must be on rehabilitation of (destroyed) water well, installation of solar panels, polytunnel (green house(s)), drip irrigation system, hydro/aerobic system and other necessary toolkits

Activity 2.2 A detailed rehabilitation plan, including cost estimations and BoQs to be developed. The BoQs have to be reviewed and approved by UNDP

Activity 2.3 Procurement of service provider and initiation of rehabilitation works

Activity 2.4 Completion of works (rehabilitation or new construction), followed by quality check and handover to end-user after UNDP's approval

Activity 2.5 A construction/tools warranty period of up to 2 months must be in place for specific sections and items

Output 3: Provide access to learning and coaching through agricultural, agri-business management skills and access to market for more durable, cost-effective and environmentally friendly agricultural practices

At least 60 (20 people in each farm, minimum 20 women) will receive training and coaching on best agricultural practices and agri-business management. The 3 model farms will be used as practical training facilities for trainees.

Activity 3.1 Developing training curriculum and rollout of a 15 day technical and agri-business management training for pre-identified 60 farmers (including members of the families who own the 3 model farms).

12 days of technical training of best agricultural practices should include: water management, use of modern irrigation system and solar power, environmentally friendly pesticides, organic fertilizers, crop diversification, hydro/aerobics, green house management, new harvesting techniques, safety...etc.

3 days of agri-business management should include management skills, ways of access to market, financial management (reducing costs and increasing income) and product presentation and packaging.

- During the training period participants will benefit from a 10 USD as a daily stipend to cover transportation cost for the training sessions over a total of (15*60*10) days*participants*amount.
- Trainings will take place over the period of 3 weeks (5 days/week and 3-4 hours/day).
- All technical/practical sessions must be conducted at the 3 model farms.
- The bidders must also include a list of items and tools needed for the practical training sessions (budget line 4.3.2).
- The 60 beneficiaries will be divided by groups of 20 (a total of 3 groups, 1 group per each farm)
- Bidders must provide CVs of 3 trainers (according to implementation plan) who need to deliver a total of 9 weeks training which must be conducted in parallel.
- The training in any of the specializations should have dedicated sessions on Health and Safety (HSE) and hygiene related to the topic of learning

Activity 3.2 Providing a toolkit to the 60 trainees that will allow them practice one of the topics covered during the training period. Each trainee is awarded a total of 850 USD worth of in-kind/cash grant support. The toolkit must include a basic HSE kit relevant to farming.
