

ANNEX 1: SPECIFICATIONS

Note: The Markets 4 Change (M4C) Project promotes gender equality through the economic empowerment of women market vendors in Fiji, Samoa, Solomon Islands and Vanuatu. The project brings together governments, market vendors and market vendor associations, civil society organizations and UN agencies. M4C is implemented by UN Women in partnership with UNDP, and the Governments of Australia, Canada and New Zealand.

The M4C Project aims to ensure that the socio-economic security of women market vendors is improved. Specifically, to ensure that market vendors' lives are improved due to strengthened financial competencies and record keeping so that they can better leverage business and financial access opportunities.

The procurement of tablets ensures that market vendors registered under the program are supported with the digital tools that would enable them to access financial services online, utilize financial technologies that would improve the management of their business ventures, access online services for financial support and micro-insurance mechanisms as well as be able to leverage market opportunities through digital technology.
