**TERMS OF REFERENCE
NATIONAL FIRM/INSTITUTION/NGO**

Name of service:	01 national media firm to produce short interview and document key events for NAP-Sup project.		
Project:	Viet Nam National Adaptation Plan (NAP) Development and Operationalization Support Project		
Reporting to:	UNDP Communications Consultant, UNDP PO on Climate Change and Environment Unit		
Duty Station:	Home-based		
Duration of Assignment:	1.5 months (55 working days)		
Start Date:	30/8/2022	End Date:	15/10/ 2022

I. BACKGROUND & PROJECT DESCRIPTION

With its extensive coastline and deltaic plains, Viet Nam is considered to be among the most vulnerable countries to climate change globally. Extreme weather events such as typhoons and tropical storms have increased in intensity, magnifying socio-economic and health impacts on rural, urban, coastal, and mountain communities, and endangering critical transportation and drainage. The Mekong Delta is one of the most susceptible deltas in the world to sea level rise.

To address climate change, the Government of Viet Nam developed a series of national climate change, green growth, and sustainable development policies, strategies, and action plans. One key planning instrument is the GoV's National Strategy on Climate Change 2012-2020. To date, the government has been able to put in place several key climate change related decisions, including the landmark Plan for Implementation of the Paris Agreement in 2016 and approved its domestic National Adaptation Plan (NAP) in the year 2020. In addition, Viet Nam is among the first countries to have submitted its Updated Nationally Determined Contribution (NDC) to the UNFCCC in July 2020, which has a strong adaptation component.

The main readiness challenge in Viet Nam to effectively address climate change is the lack of capacity in government structures to effectively integrate climate change adaptation into plans and budgets at different levels and to design, operationalize, finance, and monitor adaptation actions. Barriers include lack of technical capacity to integrate data and information, and undertake assessments for adaptation planning, lack of capacity for appraising adaptation options in sector and provincial departments, ineffective inter-ministerial coordination, lack of active participation from private sector and local communities, lack of financing

strategies, limited government and external resources, and lack of participatory and results-based monitoring and evaluation frameworks.

To address these barriers, the **Viet Nam National Adaptation Plan (NAP) Development and Operationalization Support Project (NAP-SUP)** is designed along the following outcomes:

- **Outcome 1:** Capacity for data integration enhanced and National Adaptation Plan (NAP) prepared and aligned with NDC review;
- **Outcome 2:** National adaptation plan and CCA integrated into national, subnational, and sectoral development plans and budget of priority sectors with private sector participation; and
- **Outcome 3:** Participatory results-based monitoring and evaluation mechanism developed and operationalized.

These three outcomes and their associated activities will contribute to the overall objective of the project, which is to *“establish an effective system to integrate climate change adaptation into government administration processes in the priority sectors.”* The priority sectors to be addressed under this proposal are: Agriculture and Rural Development, Transport, Health, Natural Resources and Environment, and Planning and Investment and supported by relevant ministries of Viet Nam

A number of key products to be delivered by the project are as follows:

- A database of climate information including climate scenarios, vulnerability and impacts assessment results integrated and uploaded to the NAP-web Portal (<http://adaptation.dcc.gov.vn/>)
- Inter-ministerial coordination strengthened, and appraisal capacity built to implement the NAP integration.
- Background study for a financing strategy for both public and private investment in adaptation measures prepared with a preliminary project pipeline.
- Participatory and results-based M&E framework developed for priority sectors.
- Gender Mainstreaming guidelines for priority sectors.
- NAP Technical Report to UNFCCC.
- Technical trainings of project results for relevant provincial departments.

To support the finalization of the above activities, communicate and disseminate related results, UNDP in Viet Nam is looking for 01 national media firm to firm to produce videos showing project’s impacts.
