TERMS OF REFERENCE
National Individual Consultant

Name of service:	01 Local Project Officer to support the implementation of local PMU in Binh Dinh province		
Project:	Scaling-up Integrated and Inclusive Waste Management Models through Empowering the Informal Sector and Fostering the Circular Economy		
Reporting to:	CCE Program Analyst		
Duty Station:	Binh Dinh with travels to Hanoi		
Duration of Assignment:	From July 2022 to June 2024		
Start Date:	July 01 2022	End Date:	June 29, 2024

I. BACKGROUND & PROJECT DESCRIPTION

Between 2015 and 2020 the average annual rate of municipal waste in Viet Nam increased from 21 million tons to some 35 million tons (ISPONRE, 2017) and is projected to further increase to 52 million tons by 2025) – in other words, a 2.5-fold increase within a decade. Some 70% of waste is disposed of in landfills, while the remaining 30% is burned or illegally dumped. In urban areas, more than 85% of waste is collected, but in rural areas the collection rate drops to approximately half of the urban collection rate, ranging between 40% and 45% (ISPONRE, 2018). Plastic waste, in particular, accounts for between 10% and 12% of the total amount of solid waste generated in Viet Nam, amounting to approximately 1.8 million tons every year.

Although essential to the improvement of waste management systems, at-source separation is not commonly found in Viet Nam. Challenges include the lack of commitment from households to separate their waste, lack of infrastructure to collect segregated waste, the difficulties for the city municipalities to select a location to install the infrastructures, common complaints from the households with respect to the smell, health concerns etc.

The government has issued a number of policies relating to waste and plastic management. In 2019, Resolution No. 09/NQ-CP was issued, in which the GoV has assigned the Ministry of Natural Resources and Environment (MONRE) to be the focal point of unified state management of solid waste. The National Strategy on the Integrated Management of Solid Waste by 2025, vision to 2050 approved by the Prime Minister in Decision No. 491/ QD-TTg on May 7, 2018. On plastic waste, in December 2019, the first National Action Plan for Management of Marine Plastic Litter was issued by the Prime Minister (PM). The plan sets the target of reducing marine plastic litter by 75%; collect 100% of abandoned, lost, or discarded fishing gears and put an end to the disposal of fishing gears in the sea. On August 20, 2020, the Prime Minister issued Directive 33/CT-TTg on strengthening the management, reuse, recycling, treatment and reduction of plastic waste.

In November 2020, the revised Law on Environmental Protection (LEP) was adopted. It builds the institutional basis for the development of a circular economy and strengthens the stipulation on solid waste management directives. Article 142 gives the first definition of Circular Economy, in which “design, production, consumption and service activities reduce the extraction of raw materials, materials, extend product life, reduce generated waste and minimize negative impacts”. Articles from 75 to 79 of the revised LEP provide regulations on domestic solid waste collection and treatment service based on the sorted amount of waste. In January 2022, the Decree 08/2022 was issued, it provides guiding the implementation of the LEP, comprising of criteria, roadmap and incentive mechanism to accelerate circular economy.

The project “Scaling-up Integrated and Inclusive Waste Management Models through Empowering the Informal Sector and Fostering the Circular Economy” (DWP5C phase 2) will be implemented in Binh Dinh province. The project’s objective is to deploy and test a range of interventions including on the ground support interventions for Informal Waste Worker (IWWs), a sector-focused waste management model in fisheries, and an ecosystem-level approach at innovating the value chain through a Material Recovery Facility (MRF), and then refining these models based upon the deployment and learning with a view to continued and scaled-up deployment supported by a program of capacity development and knowledge creation, sharing and dissemination. Within the project, an inclusive Material Recovery Facility for improved local material value chain will be piloted and established.

II. OBJECTIVES
