

**RFQ 2022-023\_ Purchase and delivery of computer & interactive equipment for the Situation Center.**

Questions and Answers section\*:

#	Questions of Suppliers	Answer from the UNDP CO KAZ
1	Question about the interactive display for the podium. Do you need a built-in, a mortise display in the grandstand or do you need an interactive grandstand?	<i>Embedded display is meant.</i>
2	The delivery should be with installation work. Regarding the installation work, there is a point for the delivery of equipment, but there is no installation in Appendix 2 in the table (where to enter the cost of the work). According to Section 1 of Annex 1 – "The United Nations Development Program in Kazakhstan kindly requests you to provide a commercial offer for the purchase and installation of technical equipment for the situation center".	<i>According to the tender document dated August 15, 2022, installation work is not stipulated.</i>
3	Can we get a room plan with an explication of furniture or explanations about the signal sources (operator's ARM) and their routing? That is, from which ARMs we send a signal to video walls, interactive displays and projectors - these data is necessary for calculating switching, because there are a lot of variations in the construction of the system according to technical specification.	<i>The supply of video wall equipment by this case (stage 1) is not provided. Upon completion of the entire amount of work, it should be possible to connect each ARM to the video wall (the signal to the video wall should pass from all ARMs.</i>
4	The question of position 3.3 (Bracket) is 9 pcs., the description is extremely vague, are these brackets provided for mounting ARM monitors or video walls?	<i>Brackets are provided for mounting ARM monitors.</i>
