1.1 How to use the Guide

This guide is organized in several sections that correspond to different functions of the eTendering system such as registration, submitting bids, maintaining profile, etc. Each section has its specific background colour.

The Table of Contents (TOC) provides an overview of the document content. It contains hyperlinks to the exact page of the content in the document so the reader can navigate directly to the relevant section. Each section starts with a brief overview of the content of that section with hyperlinks.

Throughout the document, there are three types of hyperlink:

- Hyperlink buttons that will take reader to the main TOC, found at the top right corner of each main chapter page, such as the one on this page.
- Hyperlinks that take readers to the beginning of the current section, usually found at the bottom left corner like in this page.
- Hyperlinked words that take reader directly to a location of the document related to the text. For example, by clicking on the [hyperlinked TOC here](#), the reader can go directly to the TOC page of this document.

1.2 What is eTendering?

The eTendering module is designed to facilitate the UNDP Tender process through online interaction. The system aims to enhance the integrity and transparency of the tender process and also enables the streamlining of the procurement process: Bidders can use eTendering to submit their bids, view solicitation documents and receive automatic notifications from the system whenever an event has been modified.

The eTendering system addresses UNDP's fundamental procurement values, such as **fairness**, **integrity**, **transparency** and **accountability**.

Some of the main benefits of the eTendering system are:

- ✓ **No late submissions are accepted:** The system will automatically not accept any bid after the deadline.
- ✓ **Electronic sealed bids:** The eTendering system encrypts the bids submitted in the system and does not allow anyone to view any information provided before the bidding deadline.
- ✓ **Electronic stamping of the bids:** The system stamps all information submitted by bidders and prevents anyone from altering, deleting, or adding anything to the bid after the deadline for submission.
- ✓ **Streamlines the bidding process:** Bidders can register in the system, retrieve all information and solicitation documents, and receive automatic notifications on certain stages of the procurement process. Bidders may also submit their bid online, edit it directly in the system, and receive automatic notifications once the evaluation is finalized and the contract is awarded.
- ✓ **Provides an audit trail:** As the eTendering system records all activity in the system, it keeps an audit trail for increased accountability and transparency.

3.5 Manage Bids – Managing a Bid After Tender Amendments

If a Tender is amended, a new version of that event will be created in the system. In most cases, bids posted to the older version will remain in "**posted**" status, but it is important that the Bidder checks that their bid response corresponds with the requirements of the newest event version.

3.5.1 Manage Bids – When a Bid is cancelled after event is amended

When amendments to the event involve any changes to mandatory bid factors or line items, the status of a previously posted bid will be changed to “**cancelled**” and you will have to submit a new bid response. To confirm that their bid has been cancelled, Bidders will receive an automatic email notification informing them that a new event version has been created and that their latest bid submission has been cancelled.

An email from UNDP with the subject "Bid Cancellation Notification for 0000001595 - UNDP1". The message body contains a note about the cancellation of the event and bid, and a link to view it in a web browser.

Bid Cancellation

If you intend to submit a new offer for this tender, please post a new bid directly in the system. It is responsibility of Bidders to ensure they have a valid and posted bid in the system.

Veuillez noter que l'offre que vous avez enregistrée ou postée pour cet événement et pour le numéro 0000001595 de version 3 mentionnées a été annulée. Elle a peut-être été annulée par vous directement, ou par le système automatiquement en raison des modifications apportées à l'appel d'offres, impliquant des modifications obligatoires pour les articles et les facteurs d'offre. Si vous avez l'intention de soumettre une nouvelle offre pour cet appel, veuillez publier une nouvelle offre directement dans le système. Il incombe aux soumissionnaires de s'assurer qu'ils ont une offre valide et publiée dans le système.

Por favor, tenga presente que la oferta que ha enviado o guardado para esta licitación con número 0000001595 de versión 3 ha sido cancelada.
