Background

Albania's vocational education and training (VET) and vocational skills development (VSD) system all too often has failed to equip students with the requisite knowledge, competences and skills for a successful transition into the labour market. This has resulted in an unsuitably qualified labour force, skills shortages and soaring youth unemployment. Recognizing the need to systematically address employment by re-orienting the vocational education and training and vocational skills development system towards labour market needs, and modernizing and extending outreach of employment services, the Albanian government adopted the National Employment and Skills Strategy 2014-2020.

UNDP globally and regionally has built a strategic vision that recognizes the importance of creating employment opportunities as a means to addressing both poverty reduction and inequalities and exclusion. Indeed, the first outcome of the recently adopted United Nations Youth System Wide Action Plan focuses on Employment and Entrepreneurship with the intention to ensure greater opportunities for youth to secure decent work and income over the life-cycle, contributing to a virtuous circle of poverty reduction, sustainable development and social inclusion. To support the integration of various youth employment policy objectives through coordinated action, UNDP Albania, in collaboration with other UN agencies has designed and implemented several skill development / employment related interventions.

After six years of experience addressing labor supply interventions, UNDP Albania's strategic vision is to contribute to building a labour-market focused skills development system that is suited to enhance the employment and entrepreneurship aspects of the unemployed in urban and rural areas, while simultaneously addressing the skills needs of those employed in the formal and informal sectors and emerging entrepreneurs.

The ambition of the Swiss funded Skills Development for Employment (SD4E) Programme is to make a systemic contribution to the modernization of Albania's VET/VSD system by addressing several key challenges: skills mismatch and unequal access to employment and training services; labour market challenges in rural areas; insufficient governance of funding for employment and training; lack of coordination / collaboration in the system; inadequate labour market information; and insufficient quality and relevance of VET and VSD providers and their programmes. The overall goal of the programme is that "more young women and men in urban and rural areas in Albania are employed or self-employed." In order to achieve this goal the programme focuses on four outcomes:

- Outcome 1: Improving and diversifying employment promotion measures, and advancing their governance
- Outcome 2: Improved environment and regulatory framework for up-scaling work-based learning schemes (elements of dual system)
- Outcome 3: Quality assurance and accreditation of VET/VSD providers
- Outcome 4: Anticipating skills needs in the short and medium term

In the context of the first outcome of the programme, a self-employment measure has been designed as an alternative way of employment generation for youth. Beneficiaries of the self-employment programme will be young people up to the age of 30. The programme contains four key elements, namely a) a training programme on self-employment; b) support to business plan development; c) assistance towards formal registration of businesses, and d) financial grant towards the purchase of equipment and materials.
