Description of Requirements

Context of the Requirement	<p>The Government of Rwanda has got the support from UNDP to implement a project “Building Transformative Policy and Financing Frameworks to Increase Investment in Biodiversity Management (BIOFIN)”. The project intends to support the Government of Rwanda to mainstream biodiversity in policies and programs across sectors in national and local levels and more importantly to measure the current biodiversity expenditures, access the financial needs in the medium term and identify the most suitable financial solutions to bridge the biodiversity national financing gap. The Government of Rwanda has already made substantive progress on the biodiversity conservation and management including the setup of the National Biodiversity Strategy and Action Plan (NBSAP). In spite of many tools and data sources, biodiversity remains difficult to quantify precisely the financial expenditures on biodiversity conservation and it is still a challenge to find resources required to implement NBSAP. But precise answers are needed to advise the Government of Rwanda on resource mobilization in biodiversity conservation and its contribution to national economy represented as GDP which does not normally capture non-market goods and services provided by ecosystems.</p> <p>Against this background, the BIOFIN project has been designed by UNDP to support the Government to put in place resource mobilization framework based on scientifically sound analyses and assessments such as biodiversity policy and institutional review, biodiversity expenditure review, biodiversity finance needs assessment as well as NBSAP costing. This will be accompanied with solid Biodiversity financial plan and development of proposals for NBSAP implementation to achieve Aichi Target. The BIOFIN is a 3 year project and has the following components:</p> <p>Component 1. Analyze the integration of biodiversity and ecosystem services in sectoral and development policy, planning and budgeting</p> <p>Component 2. Assess future financing flows, needs and gaps for managing and conserving biodiversity and ecosystem services</p> <p>Component 3. Develop comprehensive national Biodiversity Finance Plan / Resource Mobilisation Strategies to meet the biodiversity finance gap</p> <p>Component 4. Initiate implementation of the Biodiversity Finance Plan at the national level</p> <p>UNDP therefore seeks the services of a team of experts (a firm) to assess Rwanda’s policy and institutional framework for biodiversity, biodiversity expenditure review, biodiversity finance needs as well as the cost required for NBSAP implementation and to develop biodiversity financial plan and new project proposals for NBSAP implementation in Rwanda.</p>
Implementing Partner of UNDP	Rwanda Environment Management Authority (REMA)

<p>Brief Description of the Required Services</p>	<p>The assignment is aimed at developing a methodology for mainstreaming biodiversity into national development and sectoral planning to address the biodiversity financial gap. First, the firm will conduct a comprehensive assessment of the funding baseline and an evaluation of the true costs and cost effectiveness of biodiversity management. Secondly, the selected firm will provide to the Rwanda Environment Management Authority (REMA) with credible hard data on the amount of funding needed to address biodiversity loss, taking cost-effectiveness into account which will allow the country to have a sound business case for expenditure on biodiversity management. In order to meet the new targets set by the Convention on Biological Diversity (CBD) for 2011-2020, also known as the Aichi Biodiversity Targets, efforts to address the underlying challenges will need to be drastically scaled up.</p> <p>The selected firm is expected to accomplish the following tasks as broadly indicated herein:</p> <ul style="list-style-type: none"> • To carry out the Policy and Institutional Review (PIR) • To undertake Biodiversity Expenditure Review (BER) • To undertake NBSAP costing study • To assess biodiversity finance needs • To develop the National Biodiversity Finance Plan • To develop policy briefs for decision makers and wider stakeholders (the policy briefs should include a “Business case for Biodiversity”) • To facilitate validation and dissemination workshops
